

Product Name

Edge 2004™

Product Screenshot

Brief Description Edge 2004™ the best product for today's electronic records, business information /document management solution that is scalable from a single standalone client to an enterprise wide information management system. Abandoning the old WYSIWYG concept of design Edge2004 provides users the ability to individually customize the metadata fields, data type and labels to meet their needs. Edge2004 is the front end capture solution for Microsoft Sharepoint and many other content management applications. Edge2004 comes complete with database, ready to run out of the box.

Full Description

Edge 2004™ is a Microsoft tested application that manages the batch capture, scanning, classification, storage, archive and retrieval of paper and over 200 electronic document mime types including email and attachments.

Edge 2004™ provides built in interfaces to popular workflow and web based collaboration products such as Edge Workflow™, eiStream Keyflow™, Microsoft's Sharepoint, Xerox Docushare™ and EdgeVault™. It is critical for corporations to meet the business information management requirements of the many new regulations to properly manage corporate communications and documents. Edge 2004™ security features provide compliance with all of the standards and requirements of these laws.
